Concerns Investigated Between
June 16, 2022 and July 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 50327 Concern Info Neighbors are burning tires, brush, and construction debris. The neighbors bring back construction debris and household items to burn at property. They will cut down surrounding vegetation to cover the items that will be burned and to hide the items while they are being burned.								
Comments I observed a small amount of demolition waste (some sheet rock, insulation, and pieces of asphalt shingles) that had been included in a burn pile. A Letter of Unsatisfactory Findings is being issued.								
KCRO	6/16/2022	6/16/2022	ZMDR Republic Foods	Lone Jack Johnson	Odor	JH		
Concern No. 50090 Concern Info The distinct odor from Republic Foods has made its way to Hwy. 50 and Ragsdale Road. I am aware there is nothing anyone can do, especially DNR, but this will at least be in your records. It would seem if MDNR would have Republic Foods replace their septic system or cut back on the cattle slaughter done every day this would be fixed. For them it is easier to disrupt everyone's life with the strong odors they produce than to make adjustments on their part.								
Comments No odor violation noted.								
KCRO	6/16/2022	6/16/2022	ZMDR Republic Foods	Lone Jack Johnson	Odor	JH		
Concern No. 50091 Concern Info Seems to very bad odors in our area. Been smelling for quit some time. Probably the cafo place 1 mile down the road from me								
Comments No odor violations detected

Concerns Investigated Between June 16, 2022 and July 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 50353 Concern Info Finke Disposal LLC operates from this property. According to Platte County, MO GIS mapping the property is owned by Kimberly Rae Finke. It is my belief that there is burning and/or burying of trash on the back 19 acres of property and approximately 550 feet from the Platte River.								
Comments No violations observed. Property owners were informed that if we receive concern calls, we're required to investigate.								
KCRO	6/17/2022	6/22/2022	ZMDR Republic Foods	Lone Jack Johnson	Odor	JH		
Concern No. 50377 Concern Info Odor from Republic foods is horrible at my home 2 miles north of the facility. Smell has to be from their drilling waste. Something is being done wrong there for it to be this bad so much. Stinks here all the time and they were supposed to be taking care of these odors. So many neighbors are upset and DNR is failing MO families living around this thing. Looks like we will have to go back to litigation since they are failing at not being a nuisance.								
Comments ?On June 17, 2022, Olivia Jackson and I conducted a site visit. The wind was calm to 5 mph from the south. I noticed a manure smell on the southwest corner of the site near the pallets. This odor was very light. I did another area visit on July 14, 2022. At that time, I was able to detect a very light intermittent odor. It was just detectable. No odor violations at the time of the site visit. ?								
KCRO	6/28/2022	6/24/2022	AA Quarry, LLC	Kingsville Johnson	Fugitive Particulate Matter	CK		
Concern No. 50296 Concern Info Voicemail left while I was taking a different concern. Caller reports dust storm on AA highway. They're grinding right by the highway and it's so thick you can't drive through it. Caller states the Department promised they (AA Quarry) would keep the dust on their property but they don't and the Department doesn't do anything about it. Caller said they will follow up.								
Comments No dust was observed going beyond the premises of origin. No violations observed.								

Monthly Air Pollution Control Program Detail Report
Concerns Investigated Between
June 16, 2022 and July 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
KCRO	6/29/2022	6/24/2022	City of Blue Springs	Blue Springs Jackson	Odor	JS		

Concern No. 50315 Concern Info

Caller is concerned about the sewer gases coming from the sewer air vent in his neighbors back yard. Caller states that the City of Blue Springs will occasionally dump detergents down it but that doesn't work for very long before it is bad again. Caller would like the City to install a scrubber on the vent. Caller states that people in their household become sick and have headaches from the gases but the City sees it as a joke.

Comments I arrived in the area around 12:05 p.m. on 06/29/2022. It was sunny, 88°F, 45% humidity, with winds from the SW at 3 mph. I did not detect any odors from the street. I met Lester Shull in front of his house, and we discussed the concern. Lester has lived in the house for two years and said the sewer odor has been an ongoing problem. From talking to neighbors, the issue has been going on for 15 or 20 years. He said the odor occurs whenever the pumping station kicks on. He estimated that it runs at least every 30 minutes for 1 to 1.5 minutes at a time. The smell can fill the whole neighborhood at times. He said it is worse in the summer. Lester said all of the other vents in the area have a filter or burner on them, and his is the only one without a filter or burner. He said it had a filter years ago, but it broke. The city removed it and has not replaced it. Lester complains about the odor to the city often. The city brings a deodorant block and puts it in the vent approximately every six weeks, which Lester said helps the odor for about two weeks and then it gets bad again. He said that the city said the blocks are supposed to last eight weeks, so they won't bring them any more often than every six weeks. He also said that the block blows out of the tube sometimes, and he has to put it back in. On 07/01/2022, I called Lester to follow up with him, and he said that the Blue Springs Sewer contractor had been out the previous day and said they were going to install a 1,000 gallon carbon filter system on the vent. They were going to submit a bid for the system to the city, and the manager would have to approve it when he was back in the following week. They believed the system would be installed in 2 to 3 weeks.

On 07/06/2022, I spoke with Jeff Mock, Operations Manager for the city of Blue Springs, and made him aware of the concern. He said they have carbon filters on two other vents in the area and probably will end up installing a carbon filter on that vent. He will look into it and consult with his manager on it once the manager is back in. ?No odor violations were observed during the investigation.

KCRO	6/29/2022	6/28/2022	Ideker - Mosby Asphalt Plant	Mosby Clay	Fugitive Particulate Matter Odor Opacity	JS

Monthly Air Pollution Control Program Detail Report
Concerns Investigated Between
June 16, 2022 and July 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 50384 Concern Info Caller is concerned with the general operation of this facility. The plant is frequently smoky with haze and odors prevalent in the area. Occasionally, there is even a white residue left on the concerned party's yard and vehicles. Concerned party suspects the residue is from the asphalt plant. Residue not noticeable today, but that may be due to recent rains. Concerned that the facility's emissions may be higher than allowed. Has noticed physical symptoms such as matted eyes in the morning; concerned party has no allergies or other issues to attribute this to, so is worried symptoms may be caused by emissions from plant.								
Comments A Letter of Unsatisfactory Findings has been issued to Ideker, Inc. - Mosby Asphalt for failure to use a control device resulting in a significant increase in emissions.								
KCRO	6/30/2022	6/30/2022	Mike Eib	Kansas City Jackson	Open Burning	MC		
Concern No. 50282 Concern Info They burn wires for the copper. In back yard normally. Yesterday was in front yard.								
Comments This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the City of Kansas City Health Department's Air Quality Program.?

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 50285 Concern Info The Old Smithville hospital is scheduled to be demo by developer here in our little town. We have asked for paperwork on any/all environmental impact study or anything to determine possible town exposure to Esbestos. The city is not helping in this matter, they are more worried about economical growth and tax growth. This building has been sitting unused for decades. The city and local residence know about the building and when it was built. No one is allowed access to investigate for possible air contaminates. So I am reaching out to you for some assistance or possible records on any/all studies performed at this location. If your agency has tested or has information that will help the local residence be at ease about proper and safe operation of this building. Please share. We, the residence have been kept in the dark about this process. The building has not been demo yet, just scheduled for demo in near future as far as we know. Thanks, email address is ericscraig@gmail.com								
Comments The owner of the building has been made aware of the asbestos requirements. No notification has been received, but the project has not yet started; therefore, no violations have occurred at this time. I emailed the concerned party to let them know that we have not received any notification yet but that we have been in contact with the owner.								
KCRO	6/30/2022	6/30/2022	Republic Foods	Lone Jack Johnson	Odor	JH		
Concern No. 50380 Concern Info Republic Foods is causing horrible odors in the area.								
Comments At the time of the investigation, there was very little odor.

Monthly Air Pollution Control Program Detail Report Concerns Investigated Between June 16, 2022 and July 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 50375 Concern Info The people living in the abandoned house are bringing in trash from somewhere else and burning it in a an open pit								
Comments Nothing was observed to indicate anything other than household waste originating from the property owner was burned. Since the owner could not be contacted, I will send out a compliance assistance letter to Charles Moore to help ensure future burning complies with the Department's regulations.								
KCRO		7/11/2022	Wash Tub Laundromat	Independence Jackson	Asbestos			
Concern No. 50356 Concern Info Concerned party loaned her trailer to a friend who she thought was just hauling cinder block from a demolition. Apparently the ceiling started falling in and some of the debris got in the trailer. He brought the trailer back and left it on her property, still containing the material, which she believes contains asbestos.								
The demolition was being performed on part of the building at the Wash Tub laundromat at Truman and Ash Street. She does not have the name or contact info for the owner of the building, but said someone is usually at the laundromat. The person doing the demolition is Roy with RNS Services (she was unsure of this name). Roy's phone number is 816-369-6177. He is at 39th and Wabash, which is where they were supposed to dump the waste.								
The building is mostly or all down, but there is still a lot of material on site. She is concerned that there were lots of people around/in the building that may have been exposed. She doesn't know what to do with trailer of waste, as the laundromat owner and demolition person won't do anything with it.

Concern No. 50361 Concern Info Reported to US EPA on July 8, 2022 -- The quarry continues to blow up and leaving a huge cloud that engulfed the whole area. You can smell the explosives in the air along with huge clouds of dust moving across the property lines. Please send me an email so I can show you the actual video as I can't get it to upload.								
Comments								
KCRO		7/11/2022	Unknown	North Kansas City Clay	Asbestos	JS		
Concern No. 50363 Concern Info Concern referred by EPA about renovations being done at a small commercial building in North Kansas City. The concerned party reported asbestos in the building but no precautions being taken. EPA has done surveillance on the building but has not seen anyone there or any work being done there. There is a Hook and Haul dumpster outside the building that contains some renovation waste, but no obviously suspect materials, and it could not be determined if the dumpster belonged to that building or the building next door. There is a "for sale" sign outside the building. See SharePoint for all information.								
Comments								
KCRO	7/11/2022	7/11/2022	Republic Foods	Lone Jack Johnson	Odor	JH		
Concern No. 50365 Concern Info From the DNR Concern Web site -- On 800 rd and 1901 there is the smell of dead rotting flesh for about 200 foot along the road. The smell is coming from republic foods. They are supposed to have renderings gone within 24hrs so something is wrong at that place once again. Please resolve the issue								
Comments At the time of the investigation, there was very little odor.??

KCRO	7/13/2022	7/13/2022	Ideker, Inc.	Kansas City Jackson	Opacity Odor	JS		
Concern No. 50454 Concern Info Caller is concerned about the asphalt facility on 150 Highway and Colorado. He said it is behind his place of employment and one mile from an elementary school. He wants to know if the amount of smoke coming out is acceptable. Sometimes it smokes out his plant and sometimes there is a horrible smell, it depends on the day. One day the intersection of 150 Highway and 49 Highway was covered in a fog from the asphalt plant. He says the smoke and smell can depend on what they are burning that day and thinks they may sometimes burn used oil for fuel. The caller stated that the last few days the smell has been worse and there is lots of smoke today.								
Comments This concern is located within the city limits of Kansas City, MO; therefore, the concern was referred to the delegated local agency, which is the city of Kansas City Health Department's Air Quality Program.								
KCRO	7/18/2022	7/14/2022	Danielle O'Hearn	Grain Valley Jackson	Fugitive Particulate Matter	DS		
Concern No. 50449 Concern Info Landowner is knowingly allowing erosion of land and destruction of land through continued atv use to the point of clouds of dirt being emitted into the air covering surrounding houses and properties. Severe health concerns are related to this for an 80+ year old neighbor and neighbor with heart surgery and those with allergies. The erosion is now becoming severe.								
Comments No violations were found at the time of investigation. Information on regulations was provided to the responsible party. ?

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 50450 Concern Info Smell is horrible. when you go outdoors you have to go back indoors. This happens multiple days. I thought that the land application was a temporary measure. You seem not to be doing anything. I may be calling everyday. Comments ?At the time of the investigation, there was very little odor.								
NERO	6/16/2022	6/10/2022	Arch Enterprises, Inc.	Mexico Audrain	Opacity Odor	SB		
Concern No. 50566 Concern Info We spoke several weeks ago regarding air quality concerns at Arch Enterprises located at 1501 Lakeview Drive in Mexico, Missouri. As we discussed, Engineering set up an online form for local industries to track dates/times of discharge. Unfortunately, only 7 responses have been received thus far. These responses, along with photos/video, may be found on Google Drive here. With that said, Arch Enterprises had an instance yesterday which was of much higher intensity and duration than noted thus far. As such, I believe it is time to proceed in requesting an impromptu inspection from DNR. Comments Made an on-site investigation and conducted a routine compliance inspection and reviewed emission sources. The facility was in operation at the time of the inspection, but the source of the excess smoke was not operating. Details of the inspection visit are described in the inspection report. No violations were found of opacity or odor rules. Recommendations were made to have an engineering evaluation done.								
NERO	6/16/2022	6/14/2022	Harriet Dashaw	Jefferson City Cole	Open Burning	RD		
Concern No. 50172 Concern Info Caller states that their neighbors have been burning household/residential waste and possibly other waste types periodically over the last four months. According to the caller, the household has stated that they intend to obtain trash service but have yet to do so. The caller is concerned about air quality resulting from the burning. Comments No violations found during the investigation. The trailer is located on a lot that is owned individually and burning of household trash is exempt from the open burning regulation.

------	----------	-----------	--------------------------	----------------------	------	----	--	--

Concern No. 50213 **Concern Info** The company is Smithfield, the location is north of the Linn/Sullivan County line, east of Browning, MO on Highway U. The company turns on fans at large hog confinement facility. The odor is so immense that you cannot leave your windows open as it smells up your home, causes headaches when you are outside. I cannot sit outside in the mornings or enjoy the cool days of summer to cool my house. I am having to shut my windows and turn on my air, costing me money. I am in discomfort from headaches and nauseous feeling from the smell. This has been going on for years and nothing is ever done. The poor air quality is providing poor quality of life at my home. I ask that this facility be shut down or moved closer to their processing plant. Let them smell it.

Comments No odors found over the 7:1 threshold.

Monthly Air Pollution Control Program Detail Report

Concerns Investigated Between June 16, 2022 and July 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 50411 Concern Info Concerned party reports that the Royal Oak plant in Ellsinore is not being properly maintained. A fire resulted in damages that were not repaired. He is concerned that the facility is not in compliance with the air regulations and is finding ways to avoid detection by slowing fan speeds during the day. The facility's kilns along with the pipes that connect them to the afterburners leak. Creosote leaks out as a result. The reheat sections of some of the kilns are also leaking creosote.								
Comments An investigation was conducted by Jan Dunlap-Chronister and myself on June 16, 2022. Multiple violations were noted on our investigation. Leaks that allow emissions to escape the system were detected in multiple locations throughout the kiln reheat system. The same problems with the reheat system is allowing creosote to accumulate within the system which leads to the liquid escaping the system. Another investigation was conducted on July 11, 2022, and many of the same violations were observed from the road side while inside a vehicle. Photos were taken during the investigation to be used in the report. The photos used in the concern document were provided by Lance Kearby the concerned party. An RNOV have been issued and submitted on 7/12/2022. A Referral Notice of Violation (RNOV # SE2200020) was issued on July 12, 2022. An additional investigation conducted on July 11, 2022 was added to this RNOV.

Concern No. 50115 Concern Info The dust on county road 1770 West Plains , MO. is unbearable. From sunrise to sunset it creates a constant cloud or fog. It is to the point that any time outside is impossible it makes it hard to breathe.								
Comments Missouri Air Conservation Regulation 10 Code of State Regulations 10-6.170 Restriction of Particulate Matter to the Ambient Air Beyond the Premises of Origin exempts fugitive particulate matter (PM) emissions from unpaved public roads located in areas not designated as nonattainment for PM (see 10 CSR 10-6.170 (1)(A)). For this reason, the information in this environmental concern was shared with the Howell County Clerk, Ms. Kelly Waggoner, electronically via facsimile on June 22, 2022. No violation was issued.

Concern No. 50209 **Concern Info** Stayed last weekend and smelled sewer.

Comments I arrived at the site around 2:00 p.m. Friday the 24th of June. The conditions were good for detecting odors, clear sky, and very little wind. I made multiple trips around the property gauging odors and looking at the RVs on site. I spoke with a Story Creek representative over the phone on June 27th she confirmed there is a shared septic system on site, but they have had no complaints by anyone staying at the facility. I sent factsheets and a copy of the odor regulation by email to the representative. No odors were noted on this investigation with that being said there is further reason for investigation.?

Information sent via email:

Odor, Dust, Asbestos, Open Burning and Freon Emissions PUB 2200

10CSR 10-6.165 Restriction of Emission of Odors?

No further investigation needed.

Concern No. 50479 **Concern Info** CP states approximately 300 railroad ties were set on fire last week and they continue to burn. The air quality is very poor in this area and they are concerned. The railroad ties are from the removal of the old train track that was in that area. This burning area is near Hubble Creek. Gordonville Fire Dept was called and they said it is a contained fire and they received the proper permits.

Comments arrived at the concern site around 10:00 a.m. on July 7, 2022. There was a large ash pile possibly 25' long by 10' wide. It appeared the main component of the fire was probably a wood product. Based on the concern reported to the Department I focused on trying to find signs that would prove that there were railroad ties involved. I saw rail road spikes and railroad connectors in the ash pile, which suggested that the burning of railroad ties had occurred. There was a water hose and sprinkler ran to the fire attempting to stop any burning and to lower the amount of smoke. I investigated by driving to the house with the hydrant that the hose was hooked to. This was where I met Victor Cruz Marcial. He informed me that he started the fire and was trying to stop any burning and reduce smoke leaving the pile.

Concerns Investigated Between June 16, 2022 and July 15, 2022

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No. 50418 Concern Info CP states they built their house about 3 years ago and have never had a problem before until recently. They live next door to Royal Oak Charcoal plant and the kids can not go outside without coming back in with soot all over them. Smoke can clearly be seen coming out of the plant and she has never seen that before. She is concerned there is a filter issue.								
Comments An investigation was conducted on July 11, 2022 in response to an environmental concern regarding fugitive dust as well as a report of exceedance by Royal Oak. This investigation was conducted by Hayden Cassinger and Jan Dunlap-Chronister. We began our investigation by observing kiln operations on the southernmost side of the facility during regular business hours doing surveillance from the roadside and from inside the vehicle. While doing surveillance there was dust and soot being disturbed by heavy equipment movement. These fugitive emissions were observed to be propelled high into the ambient air across property boundaries. Visible emissions were also seen leaving the afterburner stack of kiln set 2. Photographs were taken of both of these violations. The investigation continued by inspecting the northernmost boundary of the facility property, to verify the location of the concerned party. It was noted that the properties adjoin with little buffer between them. While leaving from the southernmost property line we were met by Brian Matt and Justin Rollin. They informed us that a concerned party contacted the facility by telephone on the morning of July 11th. Brian Matt and Justin Rollins informed us that the concerned condition that was reported on the morning of July 11th was caused by low temperatures in the afterburner system of kiln set 2 and that the problem had been fixed. To end our investigation we made another observation on the southernmost boundary of the facility where we observed smoke escaping multiple particulate matter fans on multiple kiln sets. Photographs were taken of this violation.?								
The finding of this investigation was added to the Referral Notice of Violation (RNOV) #SE2200020 to Royal Oak - Ellsinore dated July 12, 2022. The RNOV also includes a concern investigation conducted on June 16th (received on June 10, 2022)

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	50456	Concern Info	This is a business that I owned and I sold the property and the equipment to the current owner; but I cannot remember the new owner's name. They dump their sawdust and cutoffs along with scraps from wood stakes sold to Dewitt in Sikeston, MO. He burns it in a blocked in area instead of disposing of the manufactured lumber pieces properly. I sold all the sawdust and wood pieces to the Paper Mill when I had this property. I told him that he should do the same; but he has refused to do the right thing and now he has been burning there for over seven years!					
Comments	<p>I arrived at the address at approximately 10:35 AM on July 12, 2022. From Grant City Drive, I could see a small area walled-off by concrete blocks that is used as an open burning area. In that area was a small pile of sawdust and wood scraps as well as a pillow on top. I walked up to the front of the building where I met and spoke with Jerry Lewis, Owner. I gave Mr. Lewis my business card and he informed me that he operates this building by himself. He buys scrap untreated wood and saws it down into kindling and also wooden stakes. There were only a couple of saws in an enclosed building. Mr. Lewis then takes the sawdust and untreated wood chips and takes it out to the burn area surrounded by concrete blocks. Mr. Lewis burns less than 80 cubic yards per week and does not produce more than 8,000 board feet per day. Mr. Lewis said that he burns the pile maybe once every one or two weeks.</p> <p>I suggested to Mr. Lewis that he may try to look to sell the sawdust or the wood chips as mulch to get the wood waste off his hands. Mr. Lewis said that this was the first concern that he had heard of regarding his small operation. I saw no visible emissions at this location. I told Mr. Lewis to remove the pillow from on top of the sawdust pile and to continue to burn only untreated wood waste. I left Mr. Lewis with a couple fact sheets/regulations and encouraged him to contact me with any questions or concerns he may have in the future.</p> <p>There were no visible emissions. Mr. Lewis is only burning untreated wood waste approximately once every one or two weeks. Mr. Lewis is producing less than 8,000 board feet per day and is burning less than 80 cubic yards per week.</p>

Concern No. 50511 Concern Info CP states they are bringing in material and burning it. Burning tires at present time								
Comments Jesse Evans, Environmental Specialist with the Southeast Regional Office, and I arrived at the location of the concern around 2:15 on 7/19/2022. We spoke with Warren Sansoucie, he informed us that he and his brother in-law burned tree trimming wastes that originated on the property. While burning these vegetative wastes the two men placed two tires on the fire as an accelerant. Warren Sansoucie informed us there are no more plans to burn anything else. He was receptive to the information we provided him which was "Facts on Open Burning Under Missouri Regulations - PUB 2047." From a distance we could not see any evidence of tires burned or any other prohibited materials in the burn pile although there was a pile of tires next to the burn pile. At this time there is no need for further investigation at this site. ?

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	50254	Concern Info	Miranda 6/16/22: Georgia Bartlett Called to express concern about fugitive dust emissions coming from Simpson Rock Quarry, located near her neighborhood on Sulfur Springs Road. The dust is described as coving cars and homes as well as forcing her community members to stay indoors to avoid breathing the dust. The dust is worse on hot dry days and other people on the street are planning to call the department to submit their own concern. The dust is coming from rock crushing and vehicles also are kicking up a lot.					
Comments	At 12:30-1:45 I was in the field doing a drive around of the Sulphur springs neighborhood. I did two loops around the neighborhood and observed cars/trucks entering the unpaved entrance to the Quarry							
	During the first loop: I saw three trucks enter the facility entrance that is unpaved and saw dust being kicked up, however this was ~15% opacity for all vehicles, none of which left the property boundary There was some track-out from the unpaved road to the paved portion of the neighborhood entrance however cars driving on this portion of the road did not kick-up dust (including myself) There were cars in the neighborhood that had dust on them but it was a thin layer that had been moved with windshield wipers. I noticed no accumulation of dust on trees, pavement, grass, fire hydrants, above ground storage tanks, roofs, or porches. During the second loop A truck was watering the gravel road on the Quarry entrance so I saw <5% opacity I once again looked at the neighborhood and saw no noticeable accumulation of dust on stationary objects. Once again only a thin layer on cars same as above.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	50530	Concern Info	Mr. James Waldo contacted the department about his neighbor stockpiling trade waste (tree limbs and trimmings) on May 31st. The department sent out a letter and Mr. Waldo says his neighbor continues to pile up the trade waste on his property. Mr. Waldo is anticipating that he is going to burn the waste as he has done this in the past.					
Comments	?-I spoke to James Waldo on 6/23/2022 around 3:00pm and told him we were going to visit the site and call the fire department fire chief about the situation. - Robert Andrews							
- I visisted the site on 7/7/2022. There were multiple brush piles at the site and firewood neatly stacked on a stand. There was a 55-gallon burn barrell in the front yard and the area smelled like there had been recent burning. When I got to the site, I asked to speak to Scott, but he was at work and I spoke to his girlfriend. I asked her to have him call me and gave her my card. I proceeded to tell her that bringing in tree limbs from other properties and burning to dispose of the wood was a violation and she informed me that they usually burn in the barrel with friends over.								
- I called Mr. Waldo on 7/8/2022 and explained that I did not see any violations while I was on-site. He stated when they burn the smoke will blow into his air conditioner and get into his house. I told him that if a fire department, police, or health department determine there is public health hazard, then we can issue a violation.								
SLRO	6/27/2022	6/27/2022	Unknown	Jefferson	Odor	HH		
Concern No.	50255	Concern Info	Online form submitted 10:15 pm Friday, June 24: "This morning neighbors were reporting smell of smoke. I thought it was ozone pollution"					
Comments	6/27/22 DBR - looked at facilities map, only air facilities nearby are Dry Creek Materials Morse Mill (099-0137) and Central Stone Company Morse Mill (099-0171). Address of Central Stone is 10190 State Hwy C, Hillsboro, MO 63050. Could also be open burning.							
On 6/28/2022 about 11:00 AM I went to investigate the smoke incident on Tierney Farm Drive, I talked to Mrs. Moufields @ 7680 Tierney Farm Dive, she informed me it was on 6/24/2022 that a white smoke was coming from across the valley down the river, and I was the only time this happen, I went down hill to the river area, I did not observe any smoke or burn area.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
SLRO	6/27/2022	6/27/2022	Unknown	St. Charles	Odor	LZ		

Concern No. 50258 **Concern Info** Online concern form: "There has been a strong smell of sewage or waste all throughout town off and on for several months first recall in may around my child's birthday party, but it's been around longer, and VERY noticeable in the last few weeks. Hundreds of citizens have expressed concern & would like this looked into. It has most commonly been reported in the Walmart/Wentzville Parkway area in the afternoon/evenings & most noted on warm days."

Comments ?6/27/22 DBR - looked at facilities map and did not find any air facilities near this shopping area that would could potentially produce strong odor, besides the Wentzville GM plant to the east. However, the GM odor concerns typically described a musty, chemical smell rather than a sewage/trash smell. Additionally, this concern states the odor has been on and off for several months, while GM was an issue years ago. I'm thinking this is a separate source, but do not know what it could be. Forwarded to water to investigate as well, since the concern specifically mentions sewage.

On June 27, 2022 I (LZ) called the concerned party (Melissa Humphrey, 636-358-6119, at 302 Heather Mill Drive Wentzville 63385) and let her know I will be investigating her concern and asked her if she has additional information. She emailed me what people in the area are talking on "Wentzville 411" chat group regarding the odor. Because the odor was described as sewage smell, I contacted the City of Wentzville to let them know I will be visiting the Wentzville Water Reclamation Center located at 2455 Mette Road. They provided the name (Ryan Peasel) of the person in charge of the plant. I called him and left a message.

On the PM hours of June 2022, I investigated the odor concern in the Wentzville area starting from the Water Reclamation Center about 5 miles to the north from 61 and Wentzville Parkway intersection located at 2455 Mette Road. I met Mr. David Jolley (636 639 2072), the plant supervisor. I told him the reason for my visit. I asked him if he noticed odor from the plant operations. He told me there was no odor he noticed. He offered a tour of the plant looked at the solids collected from the press room. I did not note any odor. There was no such odor at the City waste water plant that I noticed when I was there. (see SharePoint for full report)

--------	-----------------------	------------------	------------------------------------	-------------	-----------------	-----------------------	-----	------

Concern No. 50531 **Concern Info** Online concern form: "Amerigas had a 500 gallon tank at a house that I bought. They filled it. It leaks to the air. I'm in a dispute because after they said tank lease waived for 1st year, they came back and billed me (for purchasing less than 1000 gallons). They are vicious and impossible to contact. I terminated service, had tank emptied and moved from pad. Can you test it, and take it in to evidence? I am sure it can be proven that with 2 fillings a LOT of propane went into Missouri skys. 36x more damaging than carbon! Amerigas must be held accountable. I called to complain of gas smell, when the Amerigas technician came he admitted that many of their tanks leak at the "service" valve. I also paid for line testing and pressure testing within weeks of starting service, and that check was reported as passing. Are they allowed to charge customers and fill tanks that leak? They own the tank, and refuse to maintain it. If there are any class action suits already under way, please let me know. I did not give the Amerigas number, because contact with them takes hours and accomplishes NOTHING."

Comments Responded by e-mail: "Hi Gary,

We received your environmental concern report regarding the propane tank at your property. Unfortunately, our department does not have any regulations that we can enforce regarding residential propane tanks. I could not find any Clean Air Act regulations that could apply to this situation. However, I will try to point you in the right direction to help get your concerns addressed.

You can try contacting the Missouri Propane Safety Commission – they are responsible for enforcing propane rules and regulations in Missouri. Their website is <https://www.mopropanesc.org/home>

If this tank is located at your Manchester address, you can also contact St. Louis County Air Pollution Control. Their website is <https://stlouiscountymo.gov/st-louis-county-departments/public-health/environmental-services/air-pollution-control/>

Please let me know if there is anything else I can do to help. Thank you"

7/6/22 Gary responded: "The tank is in Jefferson Co. I'll write to the commission. It's just not right to bill customers for escaping fuel, let alone destroy the atmosphere."

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
SLRO	7/8/2022	7/8/2022	US Silica/KA Pazdera	Jefferson	Particulates	DR		

Concern No. 50532 **Concern Info** EPA online concern form: "Trucks from the Weber Quarry in Festus are depositing track sand on the roads as they travel to their end destination. Mr. Arnold states that there ended up being a large amount of sand that gets deposited in the roadway that then becomes airborne as traffic goes by. He states that the city of Herculaneum occasionally sweeps the streets but does not sweep the sides of the streets. The hauling company being used is KA Pazdera Hauling & Excavating. Mr. Arnold is concerned about the silica dust that may be inhaled and the results it will have on his and his families health if this continues.

Comments 7/8 I began the investigation by looking up the hauling company and the 'weber quarry.' The sand is most likely coming from US Silica (099-0008). I sent an e-mail to KA Pazdera describing the concern. I also reached out to our contact Garry Pogue with US Silica.

7/12 I called the concerned party to get more details about the concern. I left a message asking them to call me back and explained that I was trying to get in contact with the site and hauler. I also told them to contact me if it happened again.

7/15 I recieved a call back from Danny Dattoli (dattoli@ussilica.com), who replaced Garry. I described the concern and ask him to e-mail me with a good contact for KA Pazdera and a description of what practices they have in place to prevent sand from leaving the property.

7/19 I recieved an e-mail from Danny Dattoli which included the following statement: We do a few things onsite to try and prevent any track out of material. On a daily basis while we are shipping we run a truck wash that is mandatory for all trucks leaving our location/ festus stone to exit through. Just past the truck wash a sweeper truck operates continuously while we ship from the truck wash to 67 and I think vfw drive, the stop light in front of St. Pius. This ensures if we have track out its getting cleaned up. The pazderra trucks are required to tarp before leaving our facilities to ensure no sand blows off the top of the trucks, and they must do this prior to the truck wash or the sand could get wet."

I told Danny that since I have not heard back from the concerned party, we would consider this matter resolved. I also e-mailed his contact at KA Pazdera (Mike Pazdera, mikepazdera@kapazdera.com) and provided information about the concern.

Concern No. 50533 **Concern Info** EPA Online concern form: "On several occasions I have smelled a horrible smell outside, like tires burning or oil. There was like a cloud of it and finally tonight I went outside to water and pull weeds and literally it got so bad I had to come inside. I ended up with a terrible headache. After I called the neighbor up the road and she didn't know, my husband came home and we called 911. I have a bed and breakfast and luckily I didn't have guests. The fire department is right next to us and when they showed up they smelled it as well. After a little while they came over and told us that it was the mfa burning behind their building and it was almost out. It was such a toxic smell and I'm sure it wasn't something I should have been breathing in for that long. I just want to make sure they stop doing this!"

Comments ?Concerned party was emailed for further information on 7/13/22. Information was received on 7/14/22 and investigation was conducted on 7/15/22. M has two addresses in Rhineland, 115 and 201 Bluff Rd. Per concerned party, they contacted were informed by local fire department that burning material was found behind MFA and that it was almost out. There was no burned material found at the 201 location. Burned material was found on a plateau behind the 115 location. The area behind 115 is no longer owned by MFA, it was sold to Tri County Trucking Inc. prior to July 1st. During my investigation of this area, I observed a burned spot about 4 feet in circumference. The material observed look to be paper and books. At time of the investigation I observed a new building being built. Green Space Insulation was doing some work in the building, they indicated that they had start work on 7/13/22. They indicated that they had done no burning. I contacted Tri County. They indicated that they had done no burning at the location. I drove around the area and observed a small construction shop, Grotewiel Construction. It was a small shop and when asked, indicated they were not burning anything. MFA was not open at time of inspection. I talked with one person who lived a quarter mile or so from the plateau where the burning area was found. He stated that he had not smelled anything during the month of July

Concern No. 50097 Concern Info Voice mail left on SWRO phone - Caller lives 3 miles North of Monett and the odors were very strong at 6:20 to the point they had to close their windows. Caller doesn't know if it is from IDS? or from Tyson, but the odors were very strong.								
Comments See SharePoint #1868								
SWRO	6/22/2022	6/21/2022	Unknown odor in Joplin	Newton	Odor	CG		
Concern No. 50123 Concern Info Caller left message saying that odor is really bad today around his hotel, Residence Inn by Marriott, Hammons Boulevard, Joplin.								
Comments SharePoint #1893 No violation. There was a familiar, unpleasant odor in the area along the curve on Hammons Blvd. However, it was so faint it was not strong enough for a detection at a dilution of 7:1 with the Nasal Ranger. It was the strongest near the man hole in the parking lot of Residence Inn and the bridge over the stream

Note: "Concern Info" refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegation as it was made. Those statements of allegations do not necessarily reflect the legal

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Concern No.	50154	Concern Info	I received an anonymous environmental concern call this afternoon. The concern citizen said that Randy Besser has demolished two residential structures in the town of Wheatland, MO. Mr. Besser then transported the demolition waste from both buildings to a wooded property next to 19355 U.S. 54, Wheatland, MO 65779. Mr. Besser has told individuals that he plans on burning the material very soon.					
			The concern citizen said that the reason the Mr. Besser could not sell the two residential structures was because they contained asbestos. One of the homes that was demolished is located at 18787 MO-83, Wheatland, MO 65779. The concern citizen did not know where in town the second residential property was located. Mr. Besser has filled in the properties that were demolished with gravel.					
			The fire chief in the area has been alerted by the concerned citizen.

Region	Investigation Date	Date Received	Suspected Source Owner/Operator	City/County	Type of Concern	Inspector Initials	NOV	RNOV
Comments	SharePoint #1926							
	<p>On June 24, 2022 the department received an environmental concern, concerning the open dumping of construction/demolition waste from two residential structures that may contain asbestos. On June 28, 2022 at 9:50 a.m., I arrived to 19355 US 54 in Wheatland, the reported responsible parties address. According to Hickory County GIS, this property is not owned by Randy Besser, the reported responsible party. However, according to Hickory County GIS Besser owns the property west of this address. From the publicly accessible driveway, I was able to observe a large pile consisting of various construction/demolition waste, mostly painted boards and plywood, and also vegetative wastes. I did not observe any materials that would be suspected to contain asbestos. I then approached the home and an RV on site and attempted to make contact with the owners, however, no one was on site during the time of investigation. I left my contact information at both the home and the RV. Near the pile of construction waste was a front end loader, I left my contact information requesting a call back and also left fact sheets pertaining to construction wastes, asbestos containing materials, and open burning. I then left the site to continue my investigation elsewhere.</p>							
	<p>I then turned my attention to 18787 MO-83 in Wheatland, which was mentioned in the concern as a home that had been recently demolished by Besser. Upon arrival to this address, there is an old home but no demolition has occurred. I left my contact information and requested a call back. Prior to the investigation I reviewed Hickory County GIS records and found a mailing address for Besser at 18510 Grand Street, Wheatland. I then focused my investigation here but upon arrival to the address it was an old abandoned business. At this point, I ended my investigation until a response has been received from my contact requests. ?</p>							
	<p>On June 29, 2022 I received a call from Randy Besser. Besser acknowledged that he had demolished two residential structures in Wheatland and disposed of one structure on his property in Wheatland identified as Parcel ID: 06-4.0-19-000-000-004.017. Violation. I informed Besser that this is a violation of Missouri Solid Waste Law and that the demolition waste on this property must be disposed of at a permitted transfer station or landfill and cannot be burned. I also explained to Besser that he would be receiving a Letter of Warning and asked that he sign and return the acknowledgment form and also to keep and submit to the office any receipts that he receives for disposal.</p>

Comments SharePoint #2004								
SWRO	7/6/2022	7/5/2022	Kendall Outhit	Grove McDonald	Asbestos	TB		
Concern No. 50199 Concern Info Land owner bought the old Holiday Motel and tore a house down next to it, and set it on fire. They took some of the materials out, but then pushed a bunch of the house into a pile and set it on fire. The Noel Fire Department responded and should have a run report. The property owner said they were burning brush and the fire got away and got into the pile, but they had been piling it up for several days, not putting it into a roll off. There is still a strip of motel rooms left. The burning occurred on the south end. They are now piling material into a huge pile on the north end of the strip of motel rooms. It was mostly brush and a few pieces of lumber, but now they have piled a lot more lumber on it and will probably burn that too.
